

Jacob Sides

Web Engineer with an emphasis on
Front-end Development,
despite solid AWS experience

EXPERIENCE

MergerAI, Remote — *Founding Developer*

OCT 2023 - Present

- Built on Next.js with TypeScript and AWS infrastructure via SST and AWS CDK.
- Implemented responsive UI using Material-UI and TailwindCSS.
- Configured AWS Cognito with OAuth for user authentication and session management.
- Utilized Claude AI for deliverable recommendations.
- Integrated Pinecone vector database for RAG operations on AI queries, implemented using Langchain and AWS Bedrock Agents.
- Managed data persistence with DynamoDB and document storage with S3.
- Deployed serverless Lambda functions for backend processing.
- Monitored application performance using CloudWatch and CloudTrail.

Technologies: Next.js, TypeScript, AWS, SST, AWS CDK, Material-UI, TailwindCSS, AWS Cognito, OAuth, Pinecone, Langchain, AWS Bedrock, DynamoDB, S3, AWS Lambda, CloudWatch, CloudTrail

SidesSite, Remote — *Freelance Web Engineer*

NOV 2021 - Present

- Founded SideSites, a solo freelance company offering web services to clients
- Designed and built a comprehensive website for Hagler Process
 - Hosted on Netlify, utilized Sanity.io as a CMS to populate data within SvelteKit
- Developed and launched a reservation platform for ReserveNow.
 - Enabled users to pay for meals while making table reservations at participating restaurants
 - Built and deployed in under two weeks
 - Leveraged Stripe for payments, SvelteKit for the frontend, and Vercel for hosting

Technologies: SvelteKit, Netlify, Sanity.io, Stripe, Vercel

Data Recognition Corp, Remote — *Web Engineer*

JUNE 2022 - OCT 2023

- Utilize TypeScript and unit tests across a majority of services
- Introduce asynchronous stateful features to Angular web apps
- Debug AWS Lambdas using a serverless dev environment
- Setup various AWS infrastructures using Serverless

DEVELOPMENT LANGUAGES/SKILLS

- JavaScript (Primary)
- TypeScript
- Node.js
- HTML5/CSS3
- Templating - Twig & JSX
- SASS, PostCSS & TailwindCSS
- React, Svelte & Vue
- State Management
- PHP
- Jest
- GraphQL
- VCS/Git

FRAMEWORKS & TECHNOLOGIES

- Next.js & SvelteKit
- AWS
 - Lambdas
 - API Gateway
 - DynamoDB
 - S3
 - SQS
 - Bedrock
 - Secrets Manager
 - EventBridge Scheduler
- ElasticSearch
- RAG - Pinecone & LangChain
- Vercel
- WordPress & Sanity CMS
- Stripe
- Okta
- Github
- CI/CD - Jenkins & Github Actions
- Figma

AWARDS

2022 W3 Gold - Brownlee Website

1st Place KnxHx Hackathon -

Developed a trash reporting solution for communication between the city and the public.

We followed-up with a pitch to the City of Knoxville, Public Works.

- Incorporate SQS and DynamoDB in a notification service
- Reconfigure mappings for users in ElasticSearch
- Deploy EventBridge Scheduler for HR user creation tool
- Modify authentication protocols using Okta
- Maintain documentation on code features and release notes
- Monitor and debug pipeline steps in Jenkin processes

Technologies: AWS, TypeScript, Node.js, Angular, RXjs, Serverless, Okta, Jest, Jenkins

Pyxl, Remote — *Web Developer*

MAY 2020 - JUNE 2022 — Promoted from Junior in March 2021

- Developed at a full-stack level for dozens of clients
- Led development on Pyxl's first headless ecommerce build using the Next.js framework and WordPress API
- Wrote front-end code using Twig, enforcing best practices
- Replaced plugins with custom Vue-based solutions
- Trained new developers to create responsive and sharp styles
- Adopted emerging technology with a new site every 4 weeks
- Refactored our PHP core from a functional-based plugin to a class-based theme

Technologies: JS, WordPress, Node.js, PostCSS, Vue & React, Vuex & Zustand, Next.js, GraphQL

Pyxl, Knoxville, TN — *Development Intern*

APRIL 2019 - May 2020

- Fixed FE (React and Twig) and BE bugs on existing sites
- Shadowed senior developers
- Assisted other developers on WordPress-based bugs
- Developed a WP Plugin to import products via the WP API

Technologies: PHP, WordPress, JS, Node.js, Twig, SASS and TailwindCSS, VCS with BitBucket and Github

MakeMeModern Web Agency — *Web Development Intern*

JANUARY 2018 - MAY 2018

- Eased client operations by building a PDF viewer with signature input
- Coded on a professional web-stack based around the Django web framework

Technologies: JS, Python, Django

ORGANIZATIONS

HackUTK - Teaching Director:

Taught cyber security topics to dozens of students, demonstrating web exploits and general security best practices.

UTK Esports - Team Captain:

Organized and led a competitive video game team. Participated in multiple leagues, held tryouts and traveled to tournaments over the course of 4 years.

SidesSites - Founder: Solo-freelance company offering web services to clients looking to build a website from the ground up.

Tech: SvelteKit, Netlify, TailwindCSS

PROJECTS

OurJams - Web app for sharing music via the Spotify API.

Pick3 - Web app using FourSquare Places API to make restaurant recommendations.

Nodulus - Collection of web games made with Three.js 3D modeling library.

Pincity - Web app for providing and reviewing geographic feedback on points of interest in the user's city.

WyTrash - trash reporting solution for communication between the city and the public.

EDUCATION

University of Tennessee, Knoxville

AUGUST 2015 - MAY 2020

Bachelor of Science - Computer Science

Minor - Cyber Security
